

Assignment Category: CAT_01

Project Name: IdeaVault – Startup Idea Sharing Platform

 [Explanation Video](#) 

Project Theme

IdeaVault is a web-based platform where users can share innovative startup ideas, explore ideas posted by others, and engage through comments, and discussions. The system encourages creativity, collaboration, and validation of ideas through community interaction.

Instead of booking or scheduling, the platform focuses on idea validation and engagement, allowing users to discover trending ideas, provide feedback, and refine concepts collectively.

Key Rules:

- **GitHub Commits:**
 - Include a minimum of 15 notable GitHub commits on the client side.
 - Include a minimum of 8 notable GitHub commits on the server side
- **Readme.md:** Add a meaningful readme.md file with the name of your website and a live site URL on client side. Include a minimum of five bullet points to feature your website.
- **Lorem Text:** Don't use any Lorem ipsum text; you can not use the default alert to show any error or success message.
- **Host your Application:** You can choose deployment systems like Vercel, Render for hosting. As you develop a single-page application
 - Ensure that the page doesn't throw any error on reloading from any routes.
 - Logged in User must not be redirected to Login on reloading any private route

Main Requirements

Layout

Navbar

Navbar should include:

- Logo / Website Name
- Home
- Ideas
- Add Idea (Private)
- My Ideas (Private)
- My Interactions (Private)
- Login/Register (if logged out)
- User Profile Dropdown (if logged in)
 - Profile Management (User can update their profile)

The main section is dynamic, displaying content based on the selected route. It updates automatically as users navigate through different pages of the application.

Footer

Footer should include:

- Platform links (Ideas, Categories, etc.)
- Contact info
- Social links
- Copyright

Home Page (Public)

The home page will be visible to all users and includes the following sections:

Banner Section

- Minimum 3 slides
- Content related to startups / innovation
- CTA → Explore Ideas

Trending Ideas Section

Display 6 ideas using [`\$limit`](#)

- Each idea card should contain 3–4 relevant pieces of information
- View Details button

👉 Redirects to Idea Details page

Add Extra Sections (2 Required)

Authentication

Users can access login/register from navbar and protected route redirection.

Login

The user will show a Login page with a form, so that the user can Log in to this application.

Fields:

- Email
- Password
- Forget Password (UI only)
- Login button

Behavior

- Success → redirect to desired route
- Error → toast message

Additional

- Link to Register
- Google Login only

Registration

Fields:

- Name
- Email
- Photo URL
- Password

Password Validation

- Minimum 6 characters
- Must include:
 - Uppercase
 - Lowercase

Behavior

- Success → redirect to desired route
- Error → toast

 No email verification or forget password functionality required

Add Idea Page (Private Route)

Users can submit startup ideas.

Fields:

- Idea Title
- Short Description
- Detailed Description
- Category (Dropdown: Tech, Health, AI, Education, etc.)
- Tags (optional)
- ImageURL
- Estimated Budget (optional)
- Target Audience
- Problem Statement
- Proposed Solution

After Submit

- Save to database
- Show success toast

Ideas Page

Display all ideas in 3-column grid

- Each idea card should contain 3–4 relevant pieces of information
- View Details button

👉 Redirect to Idea Details page

Idea Details Page (Private Route)

Displays full idea information

Interaction System:

Comment System:

Users can:

- Add comment
- Edit own comment
- Delete own comment

Each comment includes:

- User name
- Comment text
- Timestamp

My Ideas (Private)

Shows ideas created by logged-in user

Features:

- Update (modal)
- Delete (confirmation modal)

My Interactions (Private)

Shows user activity

Includes:

- Commented ideas

Additional Requirements

- Dynamic Title: Route-based title change
- 404 Page: Custom Not Found page
- Loading Spinner: Show during data fetching
- Toast: Show toast for all CRUD + interactions

UI Design Requirements

- Must be unique (no module copy)
- Maintain:
 - Consistent typography
 - Equal card sizes
 - Clean spacing
 - Uniform button styles
- Use modern UI inspiration
- Use updated X logo instead of Twitter

Responsiveness

Must support:

- Mobile
- Tablet
- Desktop

Resources

- <https://uiverse.io/>
- <https://devmeetsdevs.com/>
- <https://themeforest.net/>
- <https://codecanyon.net/>

Challenges

JWT Authentication

- Generate token on login
- Store client-side
- Protect private routes
- Works for:
 - Email/password

- Google login

Search & Filter (Ideas Page)

Search

- By idea title
- Case-insensitive using [\\$regex](#)

Filter

- By category
- By date range ([\\$gte](#), [\\$lte](#)) - optional

Dark / Light Theme

- Toggle from navbar
- Applies globally

Optional (Highly Recommended)

- Bookmark system
- Trending algorithm (based on likes + recent activity)
- Use UI libraries (ShadCN / Flowbite / Chakra)

What to Submit

- Client-side GitHub repo
- Server-side GitHub repo
- Live website link
